

EXAMPLE MISSION

Example Mission

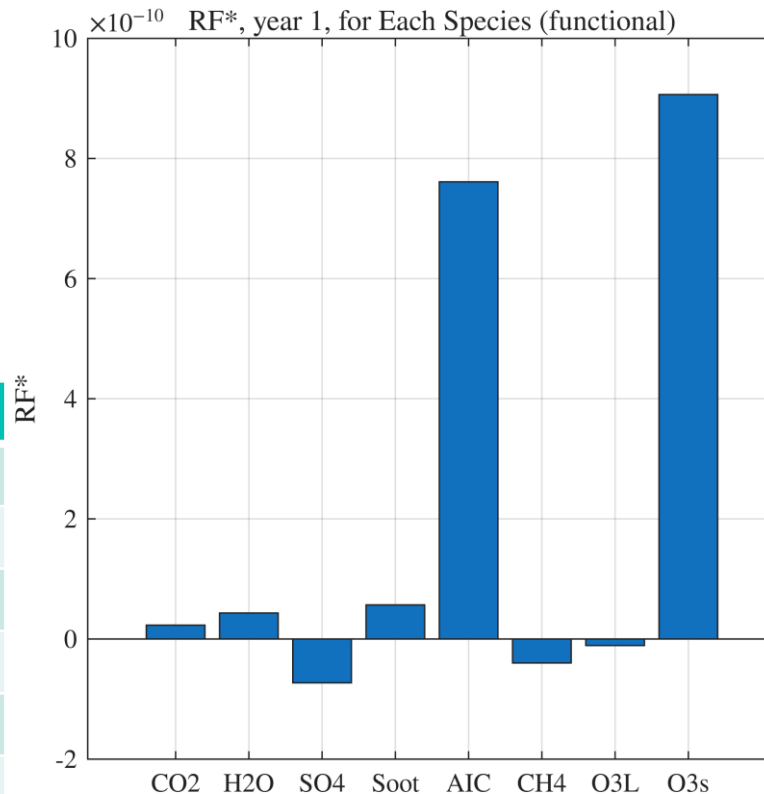

- 4000km range
- 34,000ft cruise alt
- 15t of fuel
- 50 overall pressure ratio
 - This is a big assumption (even for the same engine its not constant across flight points)
 - Isentropic expansion
- Relative humidity 0
- All altitude-dependent scale factors = 1

Species	Emissions (per kg)
CO2	3.16kg
H2O	1.26kg
SO4	0.2g
Soot	0.04g
NOx	16.2g

RF*

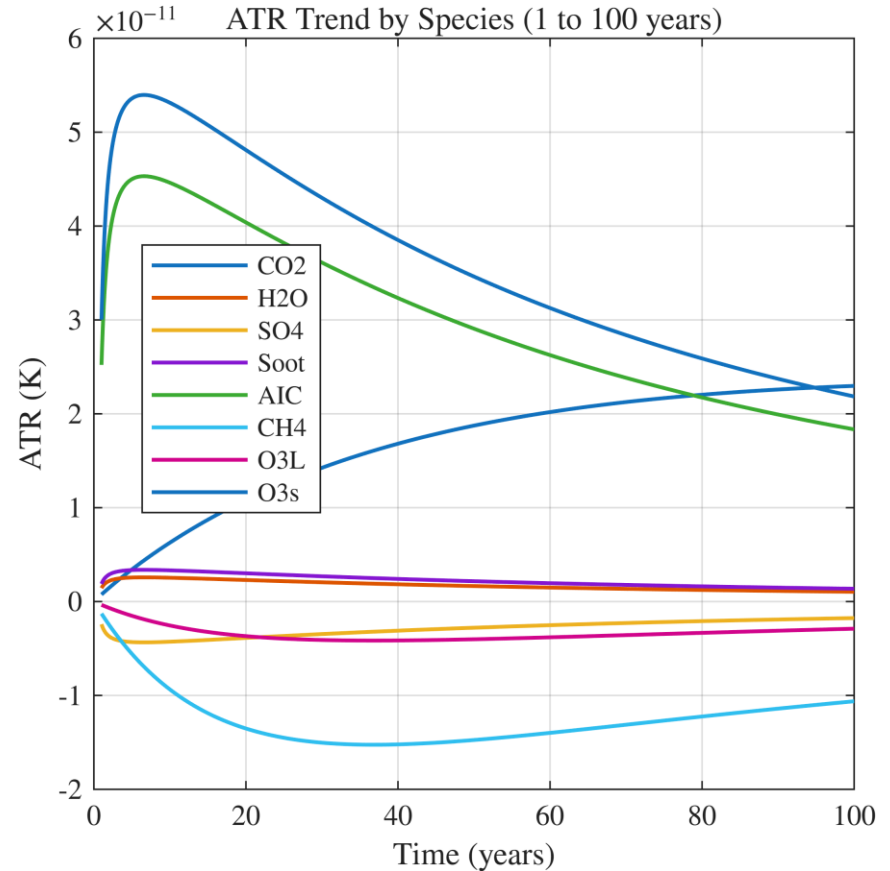

- Example RF* values at t=0 for an impulse release of all species

Species	RF* (x1e-10)
CO2	0.02
H2O	0.04
SO4	-0.07
Soot	0.06
AIC	0.76
CH4	-0.04
O3 (short)	-0.01
O3 (long)	0.91

ATR Trends

- ATR trends with different time horizons

Total ATR Trend

- Total ATR trend + ATR_{100}
